December 1st, 2022

Dear Search Committee,

I am writing to apply for the Tenure-Track assistant professor position in the department of Computer Science at Brown.

I am a postdoctoral scholar at the University of California, Berkeley working at the intersection of **Distributed Systems**, **Programming Languages**, and **Databases**. My current research takes an interesting observation: for every new platform—be it personal computers, smartphones, or web browsers—a productive programming paradigm has arrived to truly unlock its potential. It's been over a decade; what is the paradigm for the cloud? Addressing this issue spans a wide range of research areas, from core systems engineering to language design and type system development. While I have a strong record of performing both pure systems and pure programming languages research, I'm particularly motivated by research at the intersection between these fields.

**I have published research under two different names.** While **I was an undergrad at Brown**, I went by **Matthew Milano**. My CV and included materials use my current name (Mae Milano), but publisher-hosted PDFs (and old memories) may use my old name, Matthew Milano. I apologize in advance for any confusion this may cause. Additionally, I appear to share a name with a (newly arrived) adult performer, so I would recommend enabling SafeSearch when looking me up!

**I look forward to building collaborations with your faculty**, especially in **Systems**, **Databases**, and **PLT**. I'm especially excited about opportunities to collaborate with **Nikos Vasilakis** and **Malte Schwarzkopf**, among others.

I have attached a Curriculum Vitae, Research Statement, Teaching Statement, and Diversity statement to this application.

Thank you for taking the time to review my application!

Sincerely,

Mae Milano
